

## Mobile Compatible Decision Support Tool

SysArc Infomatix is proud in launching the iPhone/iPad App for processing the application through iPhones/iPads. This is the best in solution where the management personal can review the deals that are ready for their decision. With no delay, the application details can be viewed through the iPhone/iPad and decision can be made on the same. This App also helps you to monitor the performance of the front end and backend employees.

### SysArc's iPhone/iPad App is filled with lots of features that are unbeatable by other Apps

- Check the status of the application at any stage of processing
- Review new opportunities on a single touch
- Details of various payments represented in a dash board
- Displays reports in graphical or tabular form as required
- Maintenance of the Exclusive report by week or month or year
- Most of the reports can be drilled down to help in decision making
- Review company pipeline report
- Quick View of the Approved, Pending or Rejected Applications
- Graphical representation of products popularity to guide business enhancement
- The various set of reports enables the executive to view status of any application and take any corrective actions if required
